Experience

The Marketing Store

FRONT-END DEVELOPER CHICAGO, IL | NOVEMBER 2018 - PRESENT

Developed marketing-campaign scheduling software for McDonald's and contributed to the promotional site for The Avengers Endgame McDonald's promotion.

- Created wireframes, developed, tested, and debugged front-end features including offer and campaign creation, scheduling, and alerts
- Designed and developed a TypeScript-based component library using atomic design principles
- Developed glass-shattering explosion animation calculated with Delaunay triangulation drawn to Canvas
- Created a monorepo for two related applications with Gradle builds executed and deployed via Jenkins, with a Minikube local development environment
- On-boarded and assisted developers under contract working on E2E testing and integrated test suites into Jenkins pipeline workflow with AWS CodeBuild
- Designed, developed, tested, and debugged APIs, business logic, and SQL queries for offers and campaigns features with a NestJS back-end

Education

Alchemy Code Lab

WEB DEVELOPMENT PORTLAND, OR | SUMMER 2017 - WINTER 2017

Franklin & Marshall College

BACHELOR OF LIBERAL ARTS LANCASTER, PA | 2012 - 2016

Skills

LANGUAGES

JavaScript, TypeScript, Java
